Prior to examination of the subject application, please amend the application as follows:

In the Claims:

B1 6. (Amended) The method of claim 5, further comprising the steps of using said
lancing tool to create additional rows of ports in said tubular body.

Please add the following new claims:

- B2 11. A gas burner comprising:
- a) an elongate, generally cylindrical sheet metal body having an inlet end and a closed distal end and a tubular segment extending between said ends;
 - b) said inlet end including an integrally formed gas orifice holder, said holder mounting a gas orifice element;
 - c) said inlet end further formed to define at least one primary air opening arranged to admit primary air into said tubular segment;
 - d) a plurality of flame ports defined in said tubular segment downstream from said inlet end, at least some of said flame ports being formed by partially punching through a wall of said tubular segment leaving an inwardly bent tab, the effective opening of said some flame ports being determined by an extent to which said tab is bent; and,
